

K-Love radio is very important to me. I listen on FM 89.7. This is a station that does not have any sex innuendos, sex advertisements, etc. and is such a joy to me. In our community this station is listened to by a good number of the people. We have started a contemporary church service at our church since K-Love has started to broadcast in our area. To me and many thousands of people this is a much needed service in our world of violence, too much sex emphasis and just immorality. If you take this and other stations like it off the air you are doing a big dis-service to thousands of people who would have no place else to turn for good Christian based programming. This should be based on the first amendment and not on profit or prejudice.
